The complete cassette arm awning collection
from MS Design – four award-winning systems for
residential and commercial outdoor spaces.

MSDESIGN
BESPOKE LIVING AND DECOR

Four Systems. One Standard of Excellence.

Each awning in our collection is housed in a precision-formed aluminium cassette. When closed, the front bar seats perfectly inside the box – protecting the fabric from the elements and presenting a clean, minimal profile against the building.

From a compact domestic installation to a large commercial terrace, there is a system in the range designed for the task.

Cassette Arm Awnings – The System

Arm awnings with cassette are designed to house the fabric entirely within the aluminium box. When the awning closes, the front bar seats perfectly into the cassette – guaranteeing maximum protection from the weather and maintaining a minimal, clean profile at all times.

Optional Accessories

LED Ambient + LED Spot – integrated lighting in the cassette underside for evening use

Front Rolling Volant – a retractable privacy and sun-extension screen at the front bar
